What is a domain, anyway?

A domain is your online identity. It can host your school's website (www.yourschool.edu), and your email address (you@yourschool.edu).

Buying a domain is separate from your Google Apps account. If you already have one you want to use with Google Apps, enter it here.

If you don't already have a domain, we'll help you get one starting from \$8 a year.

Your education domain address

To use Google Apps for Education you need a domain specific to your school. For example, you may already own the domain: yourschool.edu. If you don't, you can purchase a domain for your school - like yourschool.org.
